

Meghna S M (Graduated 2022)

As a graduate of the BBA department at National College in 2022, I want to express how much I valued the education and support provided by the department. The faculty didn't just stick to the standard curriculum; they encouraged us to explore each topic deeply, apply it to real-world situations, and expand our learning. The department created an environment that empowered us to grow, and the dedicated faculty provided unwavering support. My time in the department played a big part in shaping who I am today, as the teachers gave us the confidence to believe in ourselves.

It felt like a second family to me, and I am especially thankful for Shibitha Teacher, the HOD, whose teaching method not only simplified complex subjects but also helped us really get to grips with the subjects. As the head of the department I have consistently observed her being incredibly supportive of her colleagues. Her support and guidance made a huge difference in my educational journey. Additionally, Nizeeba Teacher, the teacher in charge of my class, demonstrated a caring attitude and used structured teaching methods that guided us through each topic comprehensively, ensuring a solid understanding from the basics to the advanced levels. Their collective efforts have left an indelible mark on my educational journey.
